

VIJAY AMARNATH M V

Full-Stack Developer | Angular | Ionic | Node.js | TypeScript

Chennai, India | +91 94428 82709 | vijayamarnathmv@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Developer with 1.8+ years of professional experience building enterprise web and mobile applications using Angular (v14–v17), Ionic Framework, Node.js, and TypeScript. Delivered 6 production Micro Frontend modules at Purpleslate on a Module Federation architecture, serving 5 user roles with measurable improvements in deployment velocity (40%), API efficiency (35%), and bundle size (25%). Experienced in building cross-platform mobile apps with Ionic and Angular, RESTful APIs with Node.js/Express.js, and state management with NgRx and Akita. Expanding expertise into Python, Generative AI, LangChain, and RAG systems to deliver AI-powered full-stack applications.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, SASS, Python (Learning)
Frontend	Angular (v14–v17), Ionic Framework (v5/v6/v7), RxJS, Angular Material, Ionic Components, Bootstrap, Tailwind CSS
Mobile	Ionic Angular, Capacitor, Cordova, Cross-Platform (iOS & Android), PWA, Ionic Native Plugins
Backend	Node.js, Express.js, MongoDB, REST APIs, JSON, NoSQL, Mongoose, FastAPI (Learning)
State Mgmt	NgRx (Store, Effects, Selectors), Akita Store, RxJS Subjects, BehaviorSubject, Angular Signals
Architecture	Micro Frontend, Module Federation, Lazy Loading, Component Libraries, MVC, MVVM, SOLID Principles
Auth & APIs	REST APIs, HttpClient, HTTP Interceptors, JWT, OAuth 2.0, Postman, Swagger, RBAC, Route Guards
Testing	Jasmine, Karma, Jest, Unit Testing, Code Coverage, TDD
Performance	Lazy Loading, OnPush Change Detection, AOT Compilation, Tree Shaking, Bundle Optimization, Core Web Vitals
DevOps	Git, GitHub, GitLab, Bitbucket, npm, Webpack, GitHub Actions, Docker, CI/CD, Netlify
Methodology	Agile, Scrum, Kanban, Code Reviews, Pair Programming, JIRA, Confluence
Learning	Python, FastAPI, LangChain, LangGraph, Generative AI, RAG, ChromaDB, Pinecone, Anthropic API, OpenAI API

PROFESSIONAL EXPERIENCE

Junior Technology Engineer — Angular | Node.js | Ionic Developer

Sep 2024 – Present

Purpleslate Private Limited | Chennai, India

Project: Import-Export Business Approver — Multi-module enterprise platform for import/export approval workflows built on Angular Micro Frontend architecture with Ionic-based mobile views, role-based approvals, configurable forms, document verification, and real-time status tracking.

- Architected 6 independently deployable Angular Micro Frontend modules using Module Federation, cutting deployment lead time by 40% and decoupling 4 cross-functional teams.
- Developed cross-platform mobile views using Ionic Framework with Angular, enabling seamless approver access on iOS and Android with native Capacitor plugins for push notifications and file handling.

- Built full-stack Node.js + Express.js backend services with RESTful API design, MongoDB schemas (Mongoose), JWT authentication, and centralized error middleware powering 30+ API endpoints.
- Engineered 15+ complex Reactive Forms with multi-level validations, conditional approval logic, and nested FormGroups/FormArrays, powering 8 critical business workflows.
- Centralized state across 6 federated Angular modules using Akita Store and RxJS BehaviorSubjects, eliminating prop-drilling and synchronizing 100+ shared entities in real time.
- Reduced redundant HTTP API calls by 35% using RxJS operators (shareReplay, switchMap, distinctUntilChanged, debounceTime), trimming page load times from 3.2s to 1.9s.
- Built 20+ reusable Angular Material and Ionic UI components into a shared library, enforcing consistency across modules and accelerating feature delivery by 30%.
- Implemented lazy loading and route-level code splitting on 12+ feature modules, shrinking initial bundle by 25% and improving Time-to-Interactive on 3G by 1.4s.
- Developed global HTTP Interceptors handling JWT injection, automatic retries, and centralized error logging across 30+ REST endpoints in the MFE shell.
- Secured approval workflows using Route Guards (CanActivate, CanLoad) and Role-Based Access Control covering 5 user roles and 20+ permission boundaries.
- Tuned Angular change detection through OnPush strategy, trackBy, and lifecycle hooks, eliminating 60% of unnecessary re-renders on data-heavy approval grids.
- Mentored 2 junior developers on RxJS patterns and SOLID principles; led 20+ code reviews across 10 sprint cycles contributing to 95% on-time sprint delivery.
- Collaborated with Backend, QA, and DevOps teams to align REST API contracts on 30+ endpoints and configure runtime environments via ConfigMaps for staging and production.

PROJECTS

Ionic Angular Mobile App — Task Manager

Self-Initiated

Ionic Framework, Angular, TypeScript, Capacitor, Node.js, Express.js, MongoDB

- Built a cross-platform task management mobile app using Ionic Angular and Capacitor, deployed on both iOS and Android with offline-first storage using Ionic Storage.
- Integrated Node.js/Express.js backend with MongoDB for real-time sync and JWT-based authentication; used Ionic Native push notifications for reminders.
- Implemented Angular Reactive Forms for task creation, drag-and-drop prioritization, and RxJS-powered live search with debounce for instant filtering.

Full-Stack E-Commerce Platform

Self-Initiated

Angular, Node.js, Express.js, MongoDB, REST APIs, JWT, Ionic (Mobile View)

- Built end-to-end full-stack application with Angular frontend and Node.js + Express.js backend; designed MongoDB schemas with Mongoose, CRUD operations, indexing, and aggregation pipelines.
- Implemented JWT-based authentication, OAuth 2.0 integration, HTTP Interceptors, and role-based product management with Angular Route Guards.
- Added Ionic mobile view layer for product browsing and cart functionality, enabling PWA deployment with service workers and offline caching.

Personal Portfolio Website

2024

Angular, TypeScript, SCSS, Netlify — vijayamarnath.netlify.app

- Designed and developed a responsive Angular SPA showcasing 4 projects with Lighthouse Performance score of 95+ across mobile and desktop.
- Implemented lazy loading, image optimization, and AOT compilation to achieve Core Web Vitals scores in the green zone.
- Deployed via continuous integration on Netlify with GitHub-triggered builds for automated production releases.

EDUCATION

Bachelor of Technology (B.Tech), Information Technology

2019 – 2023

CERTIFICATIONS & CONTINUOUS LEARNING

- Angular — The Complete Guide (Udemy): Components, Services, Routing, RxJS, NgRx fundamentals, Standalone Components, Signals API.
- Ionic Framework with Angular (Self-paced): Cross-platform mobile development, Capacitor, Ionic Native Plugins, PWA deployment, iOS & Android builds.
- Node.js & Express.js (Self-paced): RESTful API design, middleware architecture, MongoDB integration, JWT authentication, error handling.
- Actively deepening hands-on expertise in NgRx, Angular Signals, Standalone Components, and frontend test automation (Jest/Karma).
- Currently pursuing self-paced learning in Python, Generative AI, LangChain, RAG systems, and full-stack AI application development.
