

VIJAY AMARNATH M V

Software Development Engineer | MEAN Stack Developer | 2.5+ Years Experience | MongoDB | Express.js | Angular | Node.js

Chennai, India | +91 94428 82709 | vijayamarnathmv@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Software Development Engineer with 2.5+ years of experience building and maintaining enterprise-grade web applications, ERP software, and cross-platform mobile experiences across the MEAN stack. Strong hands-on exposure to Angular, Angular CLI, Node.js, Express.js, MongoDB, TypeScript, and modern frontend architecture, with proven delivery in micro frontend platforms, REST API development, approval workflows, and business process applications. Comfortable collaborating across QA, DevOps, and backend teams while continuously deepening system design, testing, and AI-assisted development skills.

CORE COMPETENCIES

- Software Development: Writing and maintaining clean, production-ready code across Angular applications, Node.js services, and MongoDB-backed business systems using SOLID and component-driven design.
- ERP & Enterprise Workflows: Building approval flows, internal business modules, and ERP features with form-heavy UI patterns, role-based access, and backend integration.
- System Architecture & Integration: Designing REST API integrations, module boundaries, and scalable frontend/backend interactions for micro frontends and MEAN stack applications.
- Testing & Quality: Supporting reliable releases through debugging, regression prevention, structured reviews, and close coordination with QA and DevOps teams.
- Performance & Reliability: Troubleshooting application bottlenecks, reducing redundant API traffic, and improving load performance for better user experience.

TECHNICAL SKILLS

- **Frontend:** Angular (v14-v17), Angular CLI, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Ionic Framework, RxJS, Angular Material
- **Backend:** Node.js, Express.js, REST APIs, JWT, OAuth 2.0, Middleware Architecture, MongoDB, Mongoose, JSON, NoSQL
- **State & Architecture:** Akita Store, NgRx, RxJS Subjects/BehaviorSubject, Angular Signals, Micro Frontend, Module Federation, MVC, MVVM, SOLID
- **Testing & Tooling:** Jest, Jasmine, Karma, Git, GitHub, GitLab, Docker, CI/CD, Postman, Swagger, Azure Boards
- **Learning:** Python, FastAPI, LangChain, LangGraph, Generative AI, RAG systems, AI-assisted developer workflows

PROFESSIONAL EXPERIENCE

Junior Technology Engineer - Software Development Engineer (MEAN Stack)

Purpleslate Private Limited | Chennai, India | Jun 2024 - Present

Project: Import-Export Business Approver - enterprise approval workflow platform with Node.js/Express.js backend, MongoDB data layer, Angular micro frontends, and Ionic mobile views serving 5 user roles.

- Wrote and maintained production-grade Node.js + Express.js backend services and MongoDB schemas across 30+ REST API endpoints supporting core approval workflows.
- Planned and delivered a 6-module Angular Micro Frontend architecture using Module Federation, reducing deployment lead time by 40% and decoupling 4 cross-functional teams.
- Implemented 15+ complex reactive forms with multi-level validation and conditional business logic for 8 critical business processes.
- Reduced redundant API calls by 35% and improved page load times from 3.2s to 1.9s through targeted RxJS, state, and rendering optimizations.
- Built reusable shared UI components and secured workflows using Route Guards, RBAC, and centralized HTTP interceptors.
- Developed Ionic-based mobile views for on-the-go approver access on Android and iOS.
- Documented API contracts, deployment procedures, and runtime environment configuration to improve knowledge sharing across teams.
- Collaborated closely with QA, backend, and DevOps teams to align technical requirements, validate releases, and resolve integration issues.

MEAN Stack Developer

Digitalsoft Group | Madurai, Tamil Nadu, India (On-site) | Oct 2023 - Apr 2024

Project: ERP Software

- Built and enhanced ERP software modules using Angular CLI and Angular on the frontend with Node.js-backed business logic and integrations.

- Developed and consumed REST APIs to connect ERP workflows, business forms, and internal operational data across modules.
- Implemented reusable UI components, validation-heavy forms, and bug fixes that improved stability and day-to-day usability for internal users.
- Worked as part of a full-time on-site MEAN stack team to deliver features, troubleshoot issues, and ship release-ready builds.

PROJECTS

Full-Stack E-Commerce Platform - Self-Initiated

- Built an end-to-end application with a Node.js + Express.js backend and Angular frontend; designed MongoDB schemas with CRUD operations, indexing, and aggregation pipelines.
- Implemented JWT-based authentication, OAuth 2.0 integration, and role-based product management with backend-enforced access control.
- Added an Ionic mobile view for product browsing and cart functionality with PWA deployment and offline caching.

Ionic Angular Mobile App - Task Manager - Self-Initiated

- Built a cross-platform task management app with a Node.js/Express.js + MongoDB backend for real-time sync and JWT-based authentication.
- Implemented offline-first storage on the client and push notifications for reminders using Ionic Native plugins.

EDUCATION

Bachelor of Technology (B.Tech), Information Technology

Karpagam College of Engineering | Coimbatore, India | 2019 - 2023

CERTIFICATIONS & CONTINUOUS LEARNING

- GitHub Copilot Certification (Microsoft): AI-assisted software development, prompt-driven code generation, and productivity workflows.
- Node.js & Express.js (Self-paced): RESTful API design, middleware architecture, MongoDB integration, JWT authentication, and error handling.
- Angular - The Complete Guide (Udemy): Components, Services, Routing, RxJS, NgRx fundamentals, Standalone Components, and Signals API.
- Ionic Framework with Angular (Self-paced): Cross-platform mobile development, Capacitor, Ionic Native plugins, and PWA deployment.
- Currently deepening backend architecture and system design skills through Python, FastAPI, and AI-assisted development tools.
